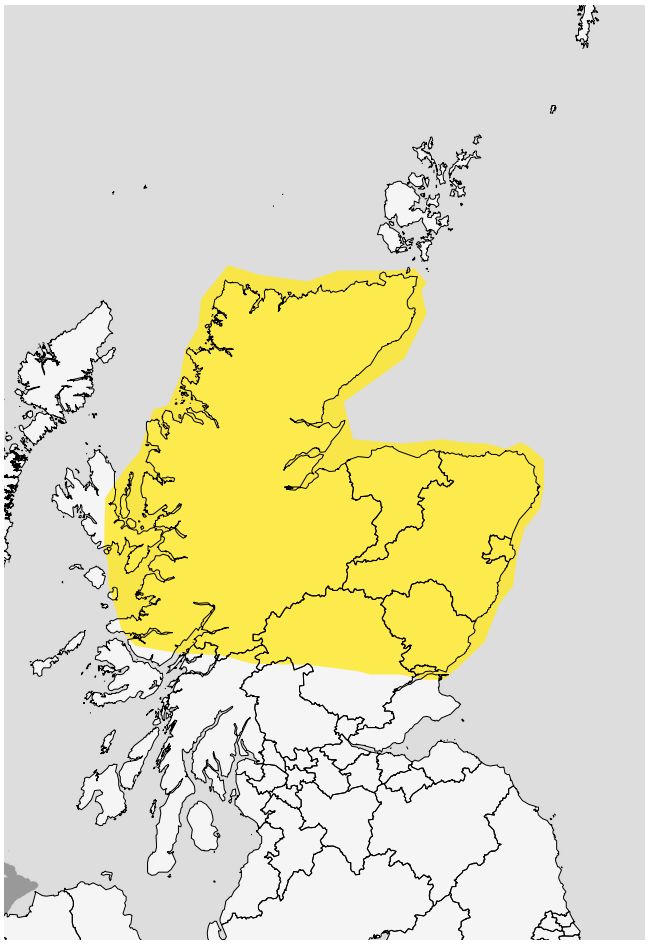
Yellow warning
Ice

Between
00:00 Mon 31 Jan 2022 and
10:00 Mon 31 Jan 2022



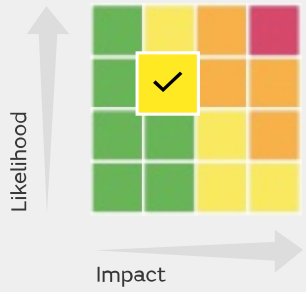
Wintry showers and falling temperatures on Monday morning will allow ice to form on untreated surfaces.

What to expect

- Probably some icy patches on some untreated roads, pavements and cycle paths
- Icy surfaces could increase the likelihood of accidents happening, as well as injuries from falls

Further details

In the wake of Storm Corrie, falling temperatures may allow a brief period of snow in a few areas, mainly on hills. Later in the night, clearer skies and wintry showers are expected, these most frequent for northwest and north Scotland, few and far between in eastern areas. These are likely to lead to ice forming on untreated surfaces, while strong northwesterly winds may lead to temporary blizzard conditions over high ground, with 1-2 cm of snow above 200 m elevation and perhaps a few cm on the highest routes.



Medium likelihood of low impacts

Issued at 11:38 Sun 30 Jan, 2022
